Surf Test

FEATURES:

- Conforming to various standards
- Storing measurement conditions and data
- Reading profiles in the LCD window
- High-speed thermal printer
- Statistical analysis functions
- Auto calibration GO/NG judgement function
- Customization function
- Arbitrary evaluation length
- One-step detector replacement
- Selectable language for display/printout

Hyper MF/MF-U Series 176-High-Accuracy Measuring Microscopes Series 176

FEATURES:

- The world's highest accuracy XY measuring accuracy of (0.9+3L/1000)µm
- Selectable LAF function
- High operability and repeatability
- Three axes motorized control
- Power-drive auto focus unit is a standard feature.

PJ-A3000 Series 302-Profile Projectors Series 302

FEATURES:

- The PJ-A3000 Series profile projectors are medium-size models that feature high versatility and easy operation.
- Easy-to-read digital XY counter is located near the projection screen to minimize eye movement.
- Digital readout protractor screen facilitates angle measurement.

Crysta-Apex C Series 191-Standard CNC CMM Series 191

FEATURES:

Engineered and constructed utilizing Mitutoyo's innovative CNC CMM technology, Crysta-Apex features lightweight materials and a stable structure. The result is a design that provides high travel stability, high accuracy, and affordability. The temperature correction function of 60.8°F to 78.8°F (16°C to 26°C) can yield accurate measurements even on the shop floor. In addition to the point-to-point measurement, the MPP-100 and a Laser Probe provide contact/non-contact scanning function.

Model No	CRT-Apex C776
X-axis	0-27.76in 0-705mm
Y-axis	0-23.82in 0-605mm
Z-axis	0-23.81in 0-605mm

Accuracy	MPEE=(1.7+3L/1000)µm**, (1.7+4L/1000)µm*** MPEP=1.7µm MPETHP=2.3µm
Work Table Size	34.65x55.91in 880x1420mm
Workpiece Height	31.50in 800mm
Workpiece Load	1760lbs 800kg

SPECIAL OFFER!!

SHIMADZU

Ask details and price

**Universal testing machines Autograph
AG-X Series**

Experience unsurpassed reliability and operability with the new Shimadzu Autograph AG-X series that delivers high-level controlled measurement performance thanks to technology taken from earlier models. Development of this series focused on intuitive operation and convenient support functions, resulting in standard equipment that includes both a color TFT touch panel screen for PC-free operation and the very popular Smart Controller operation unit seen on many of our earlier testing machines. The TRAPEZIUM X software has also been newly developed, using cutting-edge Microsoft .NET technology to enhance user-friendliness. Shimadzu's new AG-X series advances testing in three areas: performance, operability and support.

**X-Ray Instruments
EDX Series**

Energy Dispersive X-Ray (EDX) fluorescence spectrometry is used to perform qualitative and quantitative analysis of samples by measuring re-emitted characteristic X-rays from elements. The ideal tool for non-destructive applications, EDX allows measurement of a wide variety of sample types, such as solids, powders, and thin films, in many different applications areas, including electronics, chemicals, and foods.
